

ChemE & MSE PhD Seminar

Exponent[®]

800+ Consultants • 500+ PhDs • 90+ Disciplines • 40+ MIT Alumni

Jonathan Trenkle, Ph.D., Managing Engineer, Materials & Corrosion Engineering

Jonathon Harding, Ph.D., Senior Associate, Materials & Corrosion Engineering

Michael Stern, Ph.D., Managing Engineer, Thermal Sciences

Please join engineers from Exponent's Thermal Sciences and Materials & Corrosion Engineering Practices as they share an overview of the Firm and lead a technical discussion of the role of chemical and materials engineering in addressing complex and multidisciplinary engineering challenges in today's growing industries. Case studies and failure analyses in the following areas will be presented as examples:

- Fire investigations at waste facilities
- Battery-related failures in consumer electronics and products
- Material failures and selection in biomedical devices

Tuesday, May 2nd at 6:00 p.m. in 66-110

Dinner will be provided!
