

Hey everyone!

My name is June Park and I'm a Class of 2016 in course 10B. I started as an Associate last fall at Putnam Associates and am really enjoying the company culture and working in healthcare consulting. Please see below for info sessions!

We are currently accepting applications from the Class of 2018 for the Associate Consultant position. Intern recruiting for the Class of 2019 will take place in the Winter.

Putnam Associates Info Session (Ace the Case Workshop) at MIT

When: Monday, September 25th from 7:00PM-8:30PM

Where: 3-333

What: Learn about Putnam Associates, healthcare consulting, and how to crush a case interview.

MIT Fall Career Fair

When: Friday, September 29th from 10:00AM-4:00PM

Where: Johnson Athletics Center

How to Apply:

Full-Time: Submit your resume, 1-page cover letter, and unofficial transcript on CareerBridge by **Sunday, October 1st at 11:59PM**

On-Campus interviews will be taking place on Thursday, October 4th.

About the Company and Role:

For over 25 years, Putnam Associates, a premier strategy consulting firm exclusively serving the life sciences industry, has provided clarity and insight to clients' most complex challenges across all stages of the product and franchise lifecycle. [Read More.](#)

Associate Consultants gain insight into the strategic issues facing today's life sciences companies, as well as the specific challenges impacting the healthcare industry. The complexities of the industry provide an opportunity to gain comprehensive knowledge of both the science and business sides of healthcare. While responsibilities vary greatly from case to case, Associates are instrumental in developing the building blocks to identify critical issues, develop key analytical components, and ultimately, drive conclusions and recommendations. Through this process, Associates develop sound business and strategy fundamentals and a thorough understanding of solving complex business issues.

Desired Skills:

We are seeking highly intelligent and self-motivated candidates who have demonstrated excellence and leadership both as undergraduates and during previous internships and/or employment

opportunities. Proven analytic abilities, a rigorous quantitative background, and strong problem solving skills are essential. **Students from Courses 3, 5, 7, 9, 10, 14, 15, and 20 are especially well suited for this position.**

Questions?
