

Share input on a potential computational thinking requirement!

5-6:30pm Tuesday 3/20 in 56-154

[RSVP here](#)

Heard rumours about a computation GIR? Have feedback on whether or not it's warranted? Want to provide input on possible implementation? **The student representatives on the Committee on the Undergraduate Program (CUP) want to hear your feedback on a potential computational thinking requirement!**

The CUP is charged with oversight over the undergrad academic program, including GIRs. A computational thinking requirement is being considered in light of the [final report](#) from the Study Group on Algorithmic Reasoning and Computational Thinking for MIT Undergraduates.

Feel free to email cup-undergrads@mit.edu with questions, comments or feedback!
