

We are in the midst of a technology revolution that is disrupting and transforming businesses and entire industries around the world. Accenture is working with clients to apply innovation and intelligence at the heart of their organizations. Empowered with leading-edge technologies, continuous learning opportunities and a global community with deep industry expertise, you'll grow your career while solving clients' biggest challenges.

Whatever your passion, Accenture offers a range of career opportunities in our strategy, consulting, digital, technology, security or operations businesses.

Our analyst experience includes a comprehensive and multi-modal learning curriculum with common required training and specialized training specific to your career track. You'll also benefit from mentorship and coaching from our people to ensure a successful integration. Through local office corporate citizenship, inclusion & diversity and networking opportunities, we'll help you build a strong sense of community and camaraderie from the start. We are also committed to providing you varied experiences that will help you expand your skill set and broaden your exposure to all that Accenture has to offer its clients.

Security Analyst

As a **Security Analyst**, you will infuse security into everything we do at Accenture; helping our clients grow confidently in a rapidly evolving threat landscape. You'll nurture your skills through hands-on client experience across industries and our full spectrum of security services including, Strategy & Risk, Cyber Defense, Digital Identity, Application Security and Managed Security, positioning you for future specialization. You'll have the opportunity to collaborate with the brightest minds in security, leverage our advanced research and use next-gen technology like AI, machine learning and predictive analytics to pioneer security solutions.

With over 5,000 security specialists, Accenture Security is the only company in the world that has the global presence, commitment to innovation, unmatched industry know-how, and the business strategy acumen to tackle the world's most prevalent security challenges. Leveraging global resources and next-gen technologies, we create integrated, practical solutions that are tailored to each client's specific business goals and industry.

Your Role

There is never a typical day at Accenture, but that's why people love it here! As a Security Analyst you may work within the following areas:

- **Strategy & Risk** helps Boards and the C-suite develop the strategies, governance and policies needed to manage security risks
- **Cyber Defense** builds effective defenses against even the most advanced threats
- **Digital Identity** group connects the right users and customers to the right data and systems for their access and needs
- **Application Security** embeds security into the enterprise and custom applications that support the business
- **Managed Security** will run a client's key security processes, seamlessly as-a-Service

Your Experience

We are looking to build our diverse teams with individuals who are open, entrepreneurial and collaborative, and have a consistent track record of outstanding academic performance and high learning agility & a curiosity and passion for a career in Security.

Basic Qualification:

- Bachelor's degree or Master's degree (with a graduation date no later than September 30, 2019)

Preferred Qualifications:

- Preferred majors include: STEM Degree (Science, Technology, Engineering, Math) or Information Security subjects
- Strong Critical Thinking, Analytical and Problem-Solving Skills
- Excellent Communication, Organization, and Interpersonal Skills
- Team-Oriented
- Ability to Multi-Task
- Willingness to travel

How to Apply

We are also committed to providing you varied experiences that will help you expand your skill set and broaden your exposure to all that Accenture has to offer its clients.

Technology Analyst

As a **Technology Analyst**, you will have the opportunity to work on complex emerging technology and business projects across a wide range of fields and industries for some of the world's leading companies and government agencies. Your journey starts in our **Technology Development Program** designed to kick-start your career. You will build technical and professional skills through virtual and classroom training sessions with fellow Technology professionals across North America and gain hands-on experience with client projects. We also provide you career counseling and mentoring where you will connect with our leaders and build your network.

Depending on your background, interests and Accenture business need, you will be aligned to an area within technology that will allow you to enhance your skills and grow your career. You will take on challenges to deliver technology innovation, and design and implement solutions that impact our clients' business and IT imperatives.

Your Role

There is never a typical day at Accenture, but that's why people love it here! Unleash your skills and transform the world around you. Shape the technology of tomorrow with the latest digital methodologies and design thinking, like cloud, AI, intelligent automation, DevOps and Agile. Implement innovative solutions to help clients drive disruption and stay ahead of the digital curve. As a Technology Analyst, you'll test out new ideas with clients in your own unique way.

Your specific responsibilities will vary based on your alignment, but a typical day may include:

- Creating and delivering platform and custom-designed solutions for our clients' most complex technology challenges
- Building **bold new business models** via application management and implementation services
- Brainstorming with clients to **design next generation IT architectures** to meet their ever-changing business needs
- Building Proof of Concept for **new or emerging technologies** at a client site
- **Utilizing existing and newly developed programming skills** to build portions of client applications
- Leveraging our **alliances with leading companies** - such as SAP, Oracle, Microsoft, Salesforce, Workday, Cisco, HP and IBM – **to drive and accelerate real business impact**

- Incubating and **piloting the next wave of emerging technologies** for clients based on our applied research and development

Your Experience

Accenture Analysts are forward-thinking, well-rounded people with a record of outstanding academic performance and high learning agility. We're looking for individuals who can work in an open and entrepreneurial way.

Basic Qualification:

- Bachelor's degree or Master's degree (with a graduation date no later than September 30, 2019)

Preferred Qualifications:

- Consistent track record of outstanding academic performance
- Demonstrated leadership and teamwork in a military or civilian setting
- Preferred majors include:
 - Computer Science
 - Computer Engineering / Software Engineering / Electrical Engineering / Other Engineering disciplines
 - Information Systems / Decision Sciences
 - Mathematics / Statistics
 - Data Analytics / Data Science / Big Data
 - Business Administration majors with technical proficiency
- Internship or academic experience with programming languages (Java, Perl, Python, Ruby), modern web technologies (Cloud, AI, Robotics, Angular), ERP software packages, or similar technical proficiencies
