

The MIT High Throughput Sciences Core presents MilliporeSigma's Western Blotting Lunch and Learn!

**MILLIPORE
SIGMA**

TAKE THE "UGLY" OUT OF YOUR NEXT WESTERN BLOT

MilliporeSigma presents tools and techniques to improve your western blots.

A lunch and learn by MilliporeSigma's Filtration and Protein Prep Specialist, Leeanne Watson.

Monday, September 24th, 2018 12:00-1:00PM
Location: KI Auditorium, 76-156

Please register for the event by emailing:
Caitlin.Taras@sial.com

Explore the most complete portfolio of western blotting products to enable your scientific research. MilliporeSigma's western blotting tools provide affordable reagents and supplies for every step of the western blot workflow.

Protein Extraction & Preparation	Electrophoresis & Transfer	Blocking	Antibody Incubation/Washing	Detection
Amicon Ultra centrifugal filters for concentration	TruPAGE™ Precast Gels for SDS-PAGE	SNAP i.d. Full blocking in seconds, 30 minute blot processing	SNAP i.d. 2.0 system: Optimized antibody and washing conditions	Immobilon HRP substrate with pierce femto sensitivity
ProteoExtract kits for fractionation PureProteome™ magnetic beads for protein isolation	Immobilon PVDF membranes Hybond nitrocellulose membranes	Protein-free BIØk noise-cancelling reagents	80,000 western blot validated antibodies	SNAP i.d. detection system
cOmplete and SIGMAFAST protease inhibitors	Direct Detect cIR spectrometer for protein sample qualification	Buffers (including Trizma), solvents, pre-stained MW markers	Immobilon Signal Enhancer
