[available position]

Department of Chemical Engineering
Assistant Professor

The MIT Department of Chemical Engineering (https://cheme.mit.edu/) invites candidates for faculty positions starting August 2019 or thereafter. Multiple positions are available at the assistant or untenured associate professor level and will be located in Cambridge, Massachusetts. In special cases, a senior faculty appointment may also be possible. Candidates must have a Ph.D. in chemical engineering or a related field by the start of their employment. Candidates with research and teaching interests in every area relevant to the field of chemical engineering are encouraged to apply. These interests include in particular the areas of bioengineering and/or biotechnology, and computational math and process systems engineering; the latter area offers potential joint affiliation with the MIT Institute of Data Science and Society - IDSS (interest in the joint position with IDSS can be indicated on the application form). The successful candidate is expected to advise students, and develop and teach chemical engineering courses at both undergraduate and graduate levels, as well as to develop a sponsored research program and be involved in service to MIT and the profession.

Interested candidates should submit application materials electronically at https://school-of-engineering-faculty-search.mit.edu/cheme/. Each application must include: a curriculum vitae; the names and addresses of three or more references; a strategic statement of research interests; and a statement of teaching interests. It is the responsibility of the candidate to arrange for reference letters to be uploaded at https://school-of-engineering-faculty-search.mit.edu/letters/.

Please address questions to Search-Master@school-of-engineering-faculty-search.mit.edu. Responses received by December 1, 2018 will be given priority.

With MIT’s strong commitment to diversity in engineering education, research and practice, we especially encourage minorities and women to apply.

MIT is an Equal Opportunity/Affirmative Action employer.
