

# The Gordon Engineering Leadership Program (GEL)

## Hello Sophomores & Juniors!

The Gordon Engineering Leadership Program (GEL) remains actively engaged with students from across MIT, even in this virtual environment. GEL is not just a program but a community and we've been helping our current students get re-grounded, and helping them, as they help each other, prepare to be the best they can be for the rest of our virtual semester. We are also actively including newly admitted GEL1s as part of that community if interested – we would love you to be a part of that support net.

To best support you and to lend predictability to your lives and academic schedules for next fall we have temporarily extended GEL's application period (beyond the original April 5<sup>th</sup> deadline), and have transitioned to a rolling admissions system, informing students of admissions decisions soon after their virtual interviews. We encourage you to [APPLY NOW](#), since space in the program is filling fast.

GEL's [online application](#) is simple and should take no more than 30-40-mins to complete. Interviews are informal and done via Zoom.

You came to MIT to solve the world's most challenging and complex problems. MIT will give you the academic foundation to do that, but those problems will not be solved alone; they will be solved in teams – and those teams will be led by the next generation of engineering leaders. GEL will help you develop the capabilities you will need to leverage your technical skills for maximum impact. GEL also offers its students unique professional development opportunities, and connections with our extensive industry network and an active and growing alumni network. **For more info:** [gelp.mit.edu/admissions](http://gelp.mit.edu/admissions)

**Questions?** Email Eileen Milligan ([emillign@mit.edu](mailto:emillign@mit.edu))

**We hope you apply and become a part of a community that cares about its students and that you can lean on 😊**

**With Love From GEL! ❤️**
