

Diversity, Equity, and Inclusion Distinguished Speaker Series

a program of the MIT School of Engineering

Next up in the series...

[Alec D. Gallimore](#), Robert J. Vlasic Dean of Engineering at the University of Michigan will present...

Our Journey to Equity-Centered Engineering

Wednesday, March 2

2:30 pm ET

This event will be virtual – registration required

To register: email Greg Soloviev at soloviev@mit.edu to confirm your attendance and request the Zoom link

Our Journey to Equity-Centered Engineering

Simply put, we need engineers to be aware of and correct for the ways their work unwittingly impacts the distribution of wealth, power, and privilege in society. We need to first acknowledge who benefits and who is harmed, and, once understood, we need to approach the work with an intent to close—rather than unintentionally expand—these societal gaps by ensuring equitable access to opportunity.

About the series

The SoE DEI Distinguished Speaker Series, presented by the MIT School of Engineering, aims to provide opportunities for faculty, staff, and students to hear from current and former engineering leaders on how they've worked to build inclusive, respectful communities in which all people feel welcome.

This new series will offer a forum for members of the School of Engineering community to deepen knowledge and engage in open and thoughtful exchange.

Each event will consist of a 30-minute lecture followed by 30 minutes of Q+A.
