

The Labs of Katie Galloway, Mo Khalil , and Ron Weiss are delighted to invite you and your lab to attend the second Boston Mammalian Synthetic Biology (da BOMB) 2023 Symposium!

Event : Boston Mammalian SynBio (da BOMB) 2023

Time: Wed, Aug 9<sup>th</sup>, 10 am – 5 pm

Location: MIT, Koch Institute-Luria Auditorium (76-156)

Registration [link here](#)

Description: The Boston Mammalian SynBio Symposium provides a trainee-focused event to share research related to mammalian synthetic biology. Through this symposium, we aim to facilitate collaborations and community building for Boston area synthetic biologists AND more broadly for those working in mammalian biology that might benefit from connection to novel synbio tools. Undergrads are welcome to attend and apply!
